Examiner's Statement of Reasons for Allowance

1 Claims 1-2, 4, 6-9, 13-16 and 18.

2 The following is an examiner's statement of reasons for allowance:

 The prior art made of record fails to anticipate or make obvious the claimed invention. Specifically, the prior art fails to teach, in combination with the remaining elements:

 a plurality of user terminals accessible to said server via the network, each of said user terminals storing predetermined display style information in a memory before first accessing the server, the display style information being determined by a display function of each of said plurality of user terminals and specifying a display style of a file to be received from said server, the predetermined display style information corresponding one to one with a display type of each of said user terminals, wherein each of said user terminals transmits the predetermined display style information to said server automatically when each of said user terminals accesses said server as recited, or similarly recited, in claims 1, 13 and 18.

 Although Popa and Johnson teach a substantial amount of the claimed matters, Popa and Johnson fail to teach the specific limitations as indicated above. Other prior art made of record are also silent on this claim limitation.

 Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
